TECHNICAL SPECIFICATION DOCUMENT

Hindu Matrimony Platform — User Requirements Specification (URS)

Working Title: Vivah Connect **Version:** 1.0 (Draft) **Date:** 2026-11-04

Reference Basis: Nikah Connect Architecture

1. Introduction

1.1 Purpose

This User Requirements Specification (URS) establishes the functional, architectural, and operational baseline for a specialized Hindu matrimonial application (tentatively titled **Vivah Connect**). The platform reuses the proven, high-trust workflow of Nikah Connect (signup → biodata entry → privacy-protected discovery → family-approved proposal → chaperoned chat → marriage milestone) while replacing all Islamic-specific concepts with Hindu customary, cultural, and legal equivalents.

1.2 Scope

A web and mobile platform engineered exclusively for serious, marriage-oriented Hindus. Hindu, Jain, Sikh, and Buddhist users may also participate under a configurable "Dharmic communities" architecture. The platform explicitly disclaims casual dating mechanisms and prioritizes familial dignity, cultural compatibility, and verified identity.

1.3 Definitions

Term	Meaning and Customary Role
Vivah	Sacred Hindu marriage union.
Kundli / Janam Patrika	Horoscope chart calculated from natal birth date, exact time, and geographic coordinates.
Rashi / Nakshatra	Moon sign (Rashi) and birth star constellation (Nakshatra).
Gotra	Patrilineal ancestral lineage; same-gotra marriage is customarily avoided in traditional practice.
Manglik (Mangal Dosha)	Astrological placement of Mars considered in traditional astrological compatibility assessments.
Guna Milan (Ashtakoota)	Traditional 36-point lunar horoscope compatibility score across 8 qualitative criteria.
Jati / Varna / Sub-caste	Community lineage classification (strictly optional and user-controlled).
Sampradaya	Spiritual tradition or sect (e.g., Vaishnav, Shaiva, Shakta, Smarta, Arya Samaj, ISKCON).
Ghotok / Pandit	Traditional community matchmaker or priest participating in verification and matchmaking.

2. Comparative Analysis: Muslim Platform → Hindu Platform

2.1 Concept Mapping Matrix

Nikah Connect (Source)	Hindu Platform (Vivah Connect)	Architectural Action & Customization
Nikah / Nikah Mubarak	Vivah / Shubho Bibaho	Rename and redesign milestone celebration, digital certificates, and themes.
Wali (Male mahram guardian)	Family Representative (Father, Mother, Brother, Sister, Uncle, Aunt, Elder)	Modify: Hindu law does not mandate a male guardian. Mothers, fathers, and elders act as representatives for both bride and groom.
Haya (Modesty) Photo Blur	Photo Privacy Protection	Modify: Blur enabled by default for female candidates, optional for men; request-based access reveal.
Madhhab / Sect	Sampradaya + Community	Replace with Dharmic traditions, sects, and regional cultural communities.
Prayer frequency, Quran knowledge, Mosque visits	Puja frequency, scripture study (Gita, Ramayana, Vedas), Temple visits, fasting (vrata)	Replace field set with Hindu devotional, scriptural, and fasting habits.
Halal Diet	Dietary Practice (Veg, Eggetarian, Non-veg, Jain, Vegan)	Replace with customary Dharmic dietary choices and exclusions.
Beard / Hijab / Niqab	Not Applicable (Optional: tilak, post-marriage sindoor/mangalsutra preference)	Remove Islamic attire parameters; introduce optional post-marriage customary indicators.
Deen Compatibility Score	Compatibility Score (Lifestyle + Values + optional Guna Milan)	Recalibrate algorithm to weight family values, lifestyle, and optional astrological score.
Contact Shield, Verification, Pro Pass	Contact Shield, Verification, Pro Pass	Retain core safety, fraud prevention, and monetisation architecture.
Strict Age 18+	Gender- & Country-Specific Legal Age	Modify to enforce statutory minimums (e.g., 21 for males, 18 for females in India/Bangladesh).
Second-Wife Architecture	Strict Monogamy	Modify: Polygamy is strictly barred under statutory Hindu marriage laws. Married users excluded.

2.2 New Hindu-Specific Requirements

1. **Kundli Management:** Natal chart data calculation, file upload, and automated Ashtakoota Guna Milan / Manglik calculation.
2. **Gotra Lineage:** Gotra and Nanihal (maternal) gotra data capture with automated same-gotra warning advisories.
3. **Voluntary Community Classification:** Optional caste, sub-caste, and sampradaya indicators with explicit "Caste no bar" preference filtering.
4. **Dignified Remarriage:** Comprehensive, non-stigmatising profiles for widowed, divorced, and annulled seekers.
5. **Statutory Anti-Dowry Protocols:** Automated algorithmic and policy prevention of dowry solicitation.

6. **Multilingual and Regional Localization:** Multi-script support (Bengali, Hindi, English) and regional traditions (e.g., Bengali Kulin, Rarhi, Barendra).
7. **Specialized Pandit/Ghotok Registry:** Verified matchmaker and priest roles for matrimonial facilitation.

3. User Roles & Access Governance

Role	Operational Description & Scope	Pricing Tier
Groom (Seeker)	Unmarried, divorced, or widowed male candidate seeking a bride.	Free Explorer / Pro Single Vivah Pass
Bride (Seeker)	Unmarried, divorced, or widowed female candidate seeking a groom.	Free Explorer / Pro Single Vivah Pass
Family Representative	Parent, sibling, or extended family elder who monitors, reviews, and approves proposals.	Free Forever
Pandit / Ghotok	Verified traditional matchmaker or priest authorized to suggest matches and review horoscopes (Phase 2).	Free (Admin-vetted & approved)
Admin / Moderator	Internal operations team performing KYC verification, managing dispute reports, and policing platform ethics.	Internal Access

4. Functional Requirements

Priorities are classified as: **M (Must Have)**, **S (Should Have)**, and **C (Could Have)**.

4.1 Registration & Account Setup

ID	Requirement Specification	Priority
FR-1.1	Register as Seeker or Family Representative with full name, email, mobile number, date of birth, gender, password, and anti-bot validation.	**M**
FR-1.2	Enforce statutory legal marriage age based on country and gender (default: 21 male, 18 female; configurable by jurisdiction).	**M**
FR-1.3	Dual-channel identity verification through email confirmation links and mobile SMS OTP.	**M**
FR-1.4	Support account creation by candidate or parent/guardian via "Profile Managed By" metadata attribution.	**M**
FR-1.5	Localized user interface supporting English, Bengali, and Hindi scripts and terminology.	**S**

4.2 Biodata & Profile Architecture

ID	Requirement Specification	Priority
FR-2.1	Capture physical and personal data: height, weight, complexion (optional), mother tongue, citizenship, location, marital status (Never Married, Divorced, Widowed, Annulled), and dependent children.	**M**
FR-2.2	Education, qualification level, profession, organization type, and annual gross income range.	**M**
FR-2.3	Religion, Sampradaya, Caste/Jati, and Sub-caste fields with prominent "Caste no bar" option; all fields strictly voluntary.	**M**
FR-2.4	Paternal Gotra and maternal lineage (Nanihal Gotra) entry fields.	**M**

ID	Requirement Specification	Priority
FR-2.5	Lifestyle classification: Diet (Vegetarian, Eggetarian, Non-vegetarian, Jain, Vegan), smoking, and alcohol habits.	M
FR-2.6	Spiritual practice: Puja frequency, temple visits, fasting/vrata observance, scripture study, and spiritual guru or lineage affiliation.	S
FR-2.7	Family background: Parents' occupations, sibling breakdown, family structure (Joint / Nuclear), values, native ancestry, and post-marriage living arrangement preference.	M
FR-2.8	Free-text narrative bio and structured partner preferences across age, height, education, location, diet, gotra exclusion, and Manglik acceptance.	M
FR-2.9	Dynamic profile completeness score (0–100%) providing visibility and search discovery weighting.	S

4.3 Horoscope (Kundli) & Astrological Matching

ID	Requirement Specification	Priority
FR-3.1	Capture birth date, precise time (hh:mm), and place to derive Rashi, Nakshatra, and Manglik status, with manual user override capability.	M
FR-3.2	Upload verified physical Kundli charts (PDF/image) secured by permission-gated access.	M
FR-3.3	Automated 36-point Ashtakoota Guna Milan calculation displayed between candidate pairs.	M
FR-3.4	Clear Manglik status indicator (both Manglik, single Manglik, or non-Manglik).	M
FR-3.5	Astrology opt-out toggle: users may select "Horoscope Not Required" to bypass astrological scoring.	M
FR-3.6	Automated same-gotra advisory warning displayed as a non-blocking informational notice.	M
FR-3.7	Pandit matchmaking consultation workflow for human review of complex charts (Phase 2).	C

4.4 Photo Privacy & Media Management

ID	Requirement Specification	Priority
FR-4.1	Support up to 6 gallery photographs with automatic server-side blur processing.	M
FR-4.2	Three-tier photo privacy controls: Fully Public, Blurred until mutual interest accepted, or Restricted to explicit user grant.	M
FR-4.3	Granular per-user photo authorization granting and immediate revocation controls.	M
FR-4.4	Designation of primary profile picture and automated screening for modesty and policy violations.	M

4.5 Family Representative Delegation System

ID	Requirement Specification	Priority
FR-5.1	Link one or more family members via verified contact with explicit relationship designation (Father, Mother, Brother, Sister, Uncle, Aunt, Grandparent, Other).	M
FR-5.2	Configurable representative permission scopes: Approval Required, Read-Only Oversight, or Full Proxy Management.	M
FR-5.3	Universal representative support for both male and female candidates (suggested approval mode for women, strictly non-mandatory).	M
FR-5.4	Dedicated Family Dashboard displaying assigned wards, inbound proposals, polite response macros, and oversight chat view.	M
FR-5.5	Self-managed Independent Mode for candidates registering without familial involvement.	M
FR-5.6	Perpetually free tier access for all designated Family Representative accounts.	M

4.6 Discovery, Matching & Search

ID	Requirement Specification	Priority
FR-6.1	Strict heterosexual opposite-gender indexing; active married users automatically excluded from index.	M
FR-6.2	Basic search filters: age range, country, city, marital status, and native mother tongue.	M
FR-6.3	Advanced Pro filters: Sampradaya, caste/sub-caste, gotra exclusion, Manglik status, diet, education level, profession, and minimum Guna Milan score.	M
FR-6.4	Multi-variable compatibility percentage badge displayed on all search results and candidate cards.	M
FR-6.5	Daily automated curated recommendation engine based on stated partner criteria.	S
FR-6.6	Saved search profiles with instantaneous new-match push notifications and email alerts.	S
FR-6.7	Private candidate shortlist repository with confidential candidate assessment notes (Pro tier).	S

4.7 Proposal & Interest Workflow

ID	Requirement Specification	Priority
FR-7.1	Transmission of formal matrimonial interest accompanied by a polite, pre-formatted introductory note.	M
FR-7.2	Automated routing of inbound interests to designated Family Representative where approval mode is active.	M
FR-7.3	Dignified Accept/Decline response actions; acceptance unlocks encrypted chat and authorized photo access.	M
FR-7.4	Tiered daily activity throttling: Free Explorer capped at 5 interests/day and 10 views/day; Pro Pass unlimited.	M

4.8 Secure Chaperoned Communication

ID	Requirement Specification	Priority
FR-8.1	Real-time peer messaging activated solely upon mutual interest acceptance (and family approval where required).	M
FR-8.2	Automated real-time regex masking of telephone numbers, email addresses, and external social media handles.	M
FR-8.3	Automated natural language content filtering for profanity, explicit content, and harassment.	M
FR-8.4	Anti-dowry detection engine: immediate flagging and blocking of messages containing dowry or transactional asset demands.	M
FR-8.5	Direct one-click in-chat moderation reporting; visible family oversight banner informing parties of monitoring.	M
FR-8.6	Formal contact exchange channel requiring mutual two-way consent buttons from candidates and family representatives.	S

4.9 Safety, Verification & Moderation

ID	Requirement Specification	Priority
FR-9.1	Mandatory government photo ID and live selfie verification reviewed within 24–48 hours via encrypted storage.	M
FR-9.2	Prominent "Verified Seeker" trust badge applied to authenticated biodatas.	M
FR-9.3	Silent mutual blocking (complete reciprocal invisibility) and multi-tier moderation actions (warn, suspend, permanent ban).	M
FR-9.4	Optional verification audit of academic credentials and employment records (Phase 2).	C

4.10 Monetisation & Membership Architecture

ID	Requirement Specification	Priority
FR-10.1	Bifurcated model: Free Explorer Tier vs. Pro "Single Vivah Pass" (one-time fee valid until marriage confirmation).	M
FR-10.2	Pro tier entitlements: Unlimited searches, advanced filters, profile visitor history, incognito browsing, and candidate notes.	M
FR-10.3	Regional payment gateway integrations supporting bKash, Nagad, UPI, cards, and promotional discount voucher redemption.	M

4.11 Vivah Milestone & Lifecycle Closure

ID	Requirement Specification	Priority
FR-11.1	Marriage declaration workflow: candidate selects spouse, enters wedding date, and triggers counterparty/family confirmation.	M
FR-11.2	Upon confirmation: generation of commemorative "Shubho Bibaho" digital certificate and automatic status update to Married.	M
FR-11.3	Automated de-indexing: immediately close all active proposals, revoke third-party photo permissions, and lock conversations read-only.	M
FR-11.4	Voluntary success story and wedding photograph submission portal for marketing publication.	S

4.12 Settings & Data Privacy Controls

ID	Requirement Specification	Priority
FR-12.1	Self-service account management: update personal data, configure notifications, change password, and terminate active web sessions.	M
FR-12.2	Temporary profile deactivation (hiding from discovery) and permanent account/data deletion complying with erasure laws.	M
FR-12.3	Selective field-level masking: capability to conceal income, Kundli details, or caste from non-matched candidate searches.	S

5. Non-Functional Requirements (NFR)

ID	Technical Non-Functional Specification
NFR-1	**Performance & Responsiveness:** Fully responsive mobile-first web architecture; maximum target page load under 3.0 seconds on cellular 4G connections.
NFR-2	**Information Security:** Complete end-to-end HTTPS enforcement, salted Argon2/bcrypt password hashing, and AES-256 encrypted storage for government ID artifacts and Kundli charts.
NFR-3	**Authorization Architecture:** Strict Role-Based Access Control (RBAC) ensuring family representatives can view and interact only with explicitly linked ward dossiers.
NFR-4	**Accountability & Auditing:** Immutable server audit logs recording all administrative moderation events, proposal approvals, and photo reveal authorizations.
NFR-5	**Scalability & Latency:** Infrastructure scaled to sustain 100,000 active profile entities with real-time peer chat message delivery latency under 1.0 second.
NFR-6	**Typography & Accessibility:** Native multi-script typography rendering clean Bengali, Devanagari, and Latin alphabets; WCAG 2.1 Level AA compliance.
NFR-7	**Regulatory Privacy:** Data minimization and consent lifecycle enforcement, ensuring complete data deletion capability upon verified user request.
NFR-8	**Cultural Aesthetics:** Auspicious visual design language (warm saffron, crimson, deep terracotta accents) avoiding commercialized or inappropriate religious depictions.

6. Legal & Ethical Framework

The platform operates in strict compliance with the following statutory, judicial, and cultural requirements:

- **Statutory Minimum Marriage Age:** Enforces the statutory thresholds established under the Hindu Marriage Act 1955 (India) and Bangladesh legal codes (minimum 21 years for males, 18 years for females). Underage registrations are blocked at the engine level.
- **Strict Monogamy Mandate:** In alignment with codified Hindu personal law, bigamy and polygamy are prohibited. Married individuals are disqualified from utilizing the platform.
- **Dignity in Remarriage:** Codified protections ensuring widowed, divorced, and legally annulled candidates participate without operational or aesthetic discrimination.
- **Statutory Anti-Dowry Protocols:** Full compliance with the Dowry Prohibition Act 1961 (India) and Dowry Prohibition Act 2018 (Bangladesh). Terms of Service legally ban dowry exchange; automated scanning flags commercial terms for instant review.

- **Voluntary Community Identification:** Caste, sub-caste, and gotra parameters remain strictly elective. Universal "Caste No Bar" discovery paths must always be maintained.
- **Prohibited Degrees (Sapinda & Gotra):** Same-gotra and sapinda indicators function solely as informational warnings to accommodate diverse regional customs and legal exceptions.
- **Data Protection & Sovereignty:** Compliance with the Indian Digital Personal Data Protection (DPDP) Act 2023, relevant Bangladesh data rules, and GDPR for diaspora users. Explicit consent is required for astrological, biometric, and ID data processing.
- **Matchmaking Demarcation:** The platform operates strictly as an introduction facilitator and does not issue legal marriage certifications. Clear informational links guide users to civil registration authorities.

7. Phased Implementation Roadmap

Deployment Phase	Scope & Functional Deliverables
Phase 1 (MVP)	Core seeker registration, biodata capture, photo privacy management, Family Representative linkage, basic multi-attribute search, proposals, masked chat, anti-dowry filter, and ID verification.
Phase 2	Automated Kundli calculation (Guna Milan & Manglik analysis), Pro Single Vivah Pass monetisation, regional payment gateways, saved searches, and Vivah milestone confirmation.
Phase 3	Verified Pandit / Ghotok marketplace, dedicated iOS & Android native applications, extended regional vernacular interfaces, verified success story registry, and encrypted audio/video calls.

8. Architectural Assumptions & Strategic Inquiries

1. **Jurisdiction & Regional Focus:** Determination of primary launch focus across Bangladesh, India, or the global diaspora to configure currency gateways, tax compliance, and statutory age parameters.
2. **Ecumenical Inclusivity:** Confirmation on whether Jain, Sikh, and Buddhist seekers participate within universal search pools or distinct community sub-verticals.
3. **Caste Filter Launch Scope:** Decision whether detailed caste filters are active at MVP or introduced following initial user base establishment.
4. **Astrology Engine Integration:** Assessment of in-house astronomical ephemeris development versus enterprise third-party Vedic astrology APIs.
5. **Default Photo Privacy:** Strategic determination whether male profile pictures should default to blurred mode alongside female profiles.
6. **Pandit Commercial Framework:** Strategy regarding Pandit service fees and verification pipelines during subsequent commercial rollout.

9. System Acceptance Criteria

- A registered candidate can construct a verified biodata with optional horoscope details, identify prospective partners, submit a proposal, secure family representative clearance, communicate securely, and formally record a completed Vivah union.
- Communication channels successfully prevent data leaks of phone numbers, social handles, or email addresses prior to mutual consent, while automated rules flag dowry demands.
- Photographs and Kundli charts respect user-designated visibility settings at all stages of interaction.
- Profiles declaring completed marriage are immediately de-indexed from discovery algorithms, with outstanding proposals and third-party chats terminated automatically.
